This set of educational games and activities is designed for teaching mathematics, including numbers 0-20, 0-100 and place value 0-1000. Children will love learning addition and subtraction as they solve number equations to win the game. Board games are printed double sided to help save the environment. The design of these games builds on previously taught number pattern skills and follows on from 6 Number Pattern Games. Contains 4 board games, 18 dominoes, 1 flipper, spinner, counters and die.

WHAT'S MY NUMBER? GAME

An exciting game of number patterns. Help students learn to count from 1 to 50 with this exciting number patterns game. Students will love the interactive nature of the game board as they ask questions and flick down numbers to best predict their opponent's number. Can also be used for visual demonstrations of number patterns. Includes: 1 game board, 50 number cards, 10 question cards and activity guide.

MATCHMATICS BEGINNERS GAME

Develops mental calculation strategies and instant recall of multiplication, division, addition and subtraction facts. Matchmatics has 80 equation tiles and 40 tiles with an = sign. Each tile can be matched with other tiles where the answer to each equation is the same. Uses the four operations at a basic level where all the answers to the equations range from 1 to 10.

IT'S GO TIME! CARD GAME

A card game designed to help young learners practice and improve many mathematical, literacy and life skills. Players are dealt cards and try to get rid of all of them by completing maths tasks involving place value, odd/even, greater than/less than, etc. Reading comprehension and strategic thinking play an important role in the game. Includes an instruction sheet and 108 full-colour cards.

I HAVE, WHO HAS? GAMES

The entire class can have fun while practicing maths skills. Hand out all 37 cards (some players may get more than one card). The student whose card reads, "I have the first card. Who has...?" begins. The student whose card has the answer to that question responds and then asks a different question. This continues until the person with the last card gives the final answer and then reads, "This is the end of the game!"

2+ players Each box provides 4 sets of cards for 4 different games.

SMART CHUTE SK-C01

Develop key numeracy skills with this high quality card flipper. Learners will love posting the card through the slot, answering the question and seeing the answer magically appear at the bottom.

AGES
6+**TABLE TALK GAME SK-NS45**

Players show each other their cards with their finger covering the number on the bottom right. If the player answers correctly, they keep the card. Beginner players use the white side, advanced players use the black side. Can also be used to practise division.

AGES
5+**VISUAL COUNTING 1-20 SK-C74**

Counting objects, animals, ten-frames and bead strings from 1-20. Post the card into the Chute to reveal the numeric and written representation.

AGES
5+**PLACE VALUE LEVEL 1 SK-C67**

These cards set out visual patterns of numbers, developing automatic recall of the number facts to 10.

AGES
6+**DOUBLE OR HALVES LEVEL 1 SK-C07**

Improve students' ability to quickly halve and double numbers under 100. Problems on the cards include written questions as well as equations.

AGES
6+**DOUBLE OR HALVES LEVEL 2 SK-C08**

Develops an understanding of doubling, twice, half & halves using numbers up to 1000. Problems on the cards include written questions and equations.

AGES
5+**VISUAL ADDITION SK-C75**

Add the number of candles, objects or animals in a visual number sentence and watch as the answer and the numeric sentence are both revealed.

AGES
5-6**ADDITION FACTS LEVEL 1 SK-C03**

Use this pack of cards to help student's learn off by heart the addition facts from 0+1 to 9+9.

AGES
6+

ADDITION FACTS LEVEL 2 SK-C13

Learning addition facts from 10+ to 19+ is made easy with these chute cards. Frequent use will improve instant recall.

AGES
7+

ADDITION FACTS LEVEL 3 SK-C15

Extend students' ability to manipulate and calculate two digit addition facts with a focus on re-grouping using 11 and 9.

AGES
5+

VISUAL SUBTRACTION SK-C76

Subtract the number of objects in a visual number sentence and watch as the answer and the numeric sentence are both revealed.

AGES
5+

SUBTRACTION LEVEL 1 SK-C04

Frequent use of these cards will promote instant recall of the subtraction facts from -2 to -9.

AGES
6-7

SUBTRACTION LEVEL 2 SK-C14

This pack of cards promotes the learning of subtraction facts to 20. Students love the challenge of trying to improve the speed in which they can instantly recall the facts.

AGES
7+

MULTIPLICATION LEVEL 1 SK-C05

A fun way for students to practice and learn times tables off by heart. Covers x2, x3, x4, x5 and x10 multiplication tables.

AGES
8+

MULTIPLICATION LEVEL 2 SK-C06

Extend students' knowledge and instant recall of times tables with this pack. Covers x6, x7, x8 and x9 multiplication tables.

AGES
7+

DIVISION FACTS LEVEL 1 SK-C17

Using these cards will assist rapid recall of division facts using 2, 3, 4, 5 and 10.

AGES
7+

DIVISION FACTS LEVEL 2 SK-C18

Division by 6, 7, 8 and 9. Use in conjunction with C06 Multiplication Tables to highlight the relationship between division and multiplication.

AGES
5-7

TEN FRAMES TO 50 SK-C19

Students can test their knowledge of counting using the Ten Frame concept. These cards show examples from 0 - 52.

AGES
8+

FRACTIONS, DECIMALS & % SK-C10

Cards pose practical problems based around fractions, decimals and percentages. Presented as written problems and often supported by illustrations.

AGES
6+

MONEY IN REAL LIFE SK-C09

Use these cards to assist students in reading and solving simple money problems based on real life situations. Problems are presented in a variety of ways.

TARGETING MATHS PROBLEM SOLVING

In the real world, mathematics is used to reason, plan and solve problems. But for many people, problem solving remains difficult and a mystery. The Targeting Maths Problem Solving series unravels the mystery by teaching the key strategies needed to discover the solutions.

DRAGON MATHS WORKBOOKS

Best-selling 'Dragon Maths' workbook series equips primary and intermediate students with an effective and affordable mathematics resource for use in both the classroom and as homework. The skills building programme in these workbooks is based on the New Zealand Mathematics and Statistics Curriculum and the Number Framework. Each workbook contains 120 pages of interesting maths work, fully illustrated with diagrams, photos and fun dragon-themed cartoons. The full range of numeracy strategies currently being taught in New Zealand primary schools is covered in four chapters while the remainder of the workbook devotes one chapter to each of the other strands of the curriculum. Chapters include: Adding and Subtracting, Multiplying and Dividing, Fractions, Decimals, Algebra, Measurement, Geometry, and Statistics.

MENTAL MATHS WORKBOOKS

New wave mental maths is a series of student workbooks written for primary schools. Comprehensively revised to take into account the curriculum requirements, the workbooks provide an ideal platform for the development of mental skills and mathematical concepts. Features:

- Comprehensive coverage of mental mathematics concepts
- Practice in speed of recall
- Opportunities for reinforcement of ongoing mathematical concepts
- Sequential development of mathematical concepts
- A structured daily program for the whole year
- Pictorial, graphic and written representation of problems
- An inbuilt review and assessment program (levels D-G)
- Clear two colour presentation throughout
- Record pages and answers provided
- Multiple levels provide ideal opportunity for implementation into any outcomes - based program.

'ON TRACK' MATHEMATICS WORKBOOKS

'On Track' is a write-on student workbook that will help mid-band maths students achieve their full potential in Years 9, 10 and 11. These books are best bought at the start of the school year and used throughout the year as a homework resource. Alternatively, the books may be bought towards the end of the year and used as an independent study programme leading up to final exams. Instruction boxes and worked examples appear on almost every page and help students with independent study. At the end of each chapter there is a valuable revision test and a full set of answers is included. The perforated pages allow for homework assignments to be handed in while work is ongoing and the answer pages may be retained by the teacher if desired. A handy reference page illustrates the links between the chapters and the relevant curriculum levels and achievement objectives. Once completed, the workbooks provide a useful set of study notes at assessment time.
